

Sickbay Security Exercise Participant Testimonials

Found below are testimonials from several of the hospitals that participated in a previous Sickbay Security Exercise.

University of Maryland Medical Center – Baltimore – Maryland

This was a great exercise!

UMass Memorial Medical Center – Worcester – Massachusetts

The exercise was the most worthwhile expense I have had in a long time. I am glad we used your product. We plan to use more of your products in the future.

Androscoggin Valley Hospital – Berlin – New Hampshire

This was a very useful exercise and allowed us to prepare and plan for an event we hope never happens.

Mount Sinai Medical Center – Miami Beach – Florida

Great exercise and very realistic! Generated much discussion and provided reality check in thinking that you can respond well to this situation.

ValleyCare Health System – Livermore – California

I was very impressed with the Active Shooter Exercise, because staff was able to interact and share their comments on the questions and we had other managers from other organizations that shared real life "active shooter" situations that occurred in their facilities. I think this exercise provided me an understanding training staff to respond to an active shooter if very important and being prepared.

University of Maryland Medical Center – Baltimore – Maryland

This exercise provided a realistic active shooter scenario in an emergency room environment.

East Cooper Medical Center – Pleasant – South Carolina

At the end of the exercise, participants had a better understanding of the roles / responsibilities of both the internal hospital staff and the outside responders during an active shooter event.

ValleyCare Health System – Livermore – California

The format of the exercise was great. This allowed for good group discussions, enabling us to determine what challenges need to be met. For instance, installing lock boxes in the outside of the facility with needed items for law enforcement (maps, master key, proximity badges, etc.).

Longmont United Hospital – Longmont – Colorado

The exercise with injects provided real-life situations that made it easier to discuss how our facility would respond. This made the exercise much better than just speaking in generalities.

East Cooper Medical Center – Pleasant – South Carolina

Excellent - Learned so much more than just following a policy.

ValleyCare Health System – Livermore – California

Great Content!

Longmont United Hospital – Longmont – Colorado

The exercise provided us with the opportunity to identify problems as well as identify possible solutions to those problems.

East Cooper Medical Center – Pleasant – South Carolina

The exercise provided excellent insight into a step-by-step emergency and what to expect.

ValleyCare Health System – Livermore – California

Staff was engaged in throughout the exercise!

The exercise questions were well thought out and staff did an excellent job answering questions.

Cheshire Medical Center / Dartmouth Hitchcock Keene – Keene – New Hampshire

It was a great exercise and I am happy our facility had the opportunity to participate

St Joseph's Health Services – Hillsboro – Wisconsin

I think we need to do more exercises like this.

Yuma District Hospital – Yuma – Colorado

We had a VERY successful exercise!

Baptist Health Lexington – Lexington – Kentucky

Our team at Baptist Health Lexington thoroughly enjoyed the exercise.

UMass Memorial Medical Center – Worcester – Massachusetts

Great Exercise! It was well received at UMass Memorial Medical Center.

East Cooper Medical Center – Pleasant – South Carolina

This was an outstanding exercise.

UMass Memorial Medical Center – Worcester – Massachusetts

I thought the exercise was excellent and it was well received by all that attended!

As a Director of Emergency Management and Preparedness of a large multi-campus Medical Center I would certainly recommend this program to my counterparts in health care.

St Francis Xavier Hospital – Charleston – South Carolina

Liked how the exercise was conducted, videos added to realism, offer suggestions after discussion points of other best practice sites, making it not just an exercise but a tutorial as well.

Medical University of South Carolina – Charleston – South Carolina

The exercise provided an opportunity for great dialogue which helped us understand where our weaknesses are within the hospital and in the community.

Androscoggin Valley Hospital – Berlin – New Hampshire

The exercise generated great discussion with local police, hospital security, administration, nursing supervisors and ER personnel.

East Cooper Medical Center – Pleasant – South Carolina

Although I hope and pray never to be in an event such as this, it is an extremely real possibility. This was a great opportunity to apply our current disaster preparation process and knowledge to identify areas where gaps exist or alterations are needed based on the scenario.
